

Training Leaders to Appoint Them Missionaries

Thanks for your prayers

Health and blessings, we are grateful for the opportunity to send an update on life and ministry, we have not sent news for a few days, we want to thank you for staying with us all this time, it fills us with joy to be associated with you, this race Serving Jesus could not be possible if you are not part of our lives, we faithfully believe that the Lord has associated us with you with the purpose of exalting his name, God is reaching a greater number of people with the message of salvation and life people, his purpose is to reach every man, woman and child to redeem their lives, this is not only about Paul and Tania and our ministry here in Honduras, it is also about how God uses you for his universal work, He bless us through you so that we can be of help and blessing to others, thus give comfort and hope to save many; thank you for being part of our lives.

2023 has been a very busy year, we had many tasks to perform, Tania and I have spent a lot of time training, we have been studying the Bible more and putting into practice what we have learned, we continue to advance in the study of our doctorate in Theology ; A few months ago we completed our degree in Missiology, during this process of our formation we have also simultaneously trained the churches that we are planting in the region; we have been careful to invest a special time in those that we identify a specific call in which we have also invested many hours in training them, they are our team of Volunteer Missionaries; are (Leaders in Training), we do this because we know that Jesus did it that way, He invested time in his disciples, that teaches us that we must do the same with the leaders in training, we know that the ministry does not depend on Paul and Tania only but to add others to this vision of God in the ministry here in Honduras, we want the work of the Lord Jesus is doing with us to last for generations, we want new churches planted, we work towards planting two more for this year 2023, but we know that the way Jesus would do it would be investing time in people, loving people and training them, we want to teach them to have a life based on intentional discipleship, we do it by living together and spending special time with them, we want teach them to be healthy in everything and to be useful to teach others and to take up the challenge that while they go around the world they continue with the task of going and speaking to every town or nation about the gospel and faith in Jesus (2 Timothy 2:2, Matthew 28:19-20). We pray for the new church in the village of El Tintel, this is a very poor area, we need to build the building for the church, for stage number one of this project in 2023 we need to raise \$10,000.00, in this place we will be training new missionary leaders, and we can teach women bible and entrepreneurship classes to improve lives.

Thank you for partnering with us, thank you for offering to our ministry. This has allowed us to continue preaching and planting churches, but above all it helps us to train others and establish healthy leaders and churches; please pray for what God is doing in these hearts, pray for the Lord to confirm the full-time call of new pastors, teachers, evangelists. In our team three have resigned their jobs to be in the missions, they do not have support for this task. They have their faith in the provision of God, they are serving throughout the Central region of Honduras, pray for them, that their faith does not fail, God provides their needs. We will be praying for you and your family.
